

# Animation basics

**Animation** - Is an action, displayed by a sequence of images (frames).

**Frame** - Is a single image of an animation.

**Keyframe** - Is an image that defines a starting and ending point of an action.

**Animation Cycle** - Is a property of an Animation, that defines the duration and the number of frames of an Animation.

**Frames per second (FPS)** - Defines how many frames are shown in one second (1000 milliseconds)

Key Frame

Frame 1  
150 ms

Frame 2  
150 ms

Frame 3  
150 ms

Frame 4  
150 ms

Key Frame

---

**Animation Cycle** = 4 frames, 600 ms  
≈ 7 **Frames Per Second (FPS)**
