

Practice

Practice. Try reaching first 150 practice hours as soon as possible. Things will start getting easier from there.

Get feedback. Feeling shy sharing your work? Send your work to me for feedback!

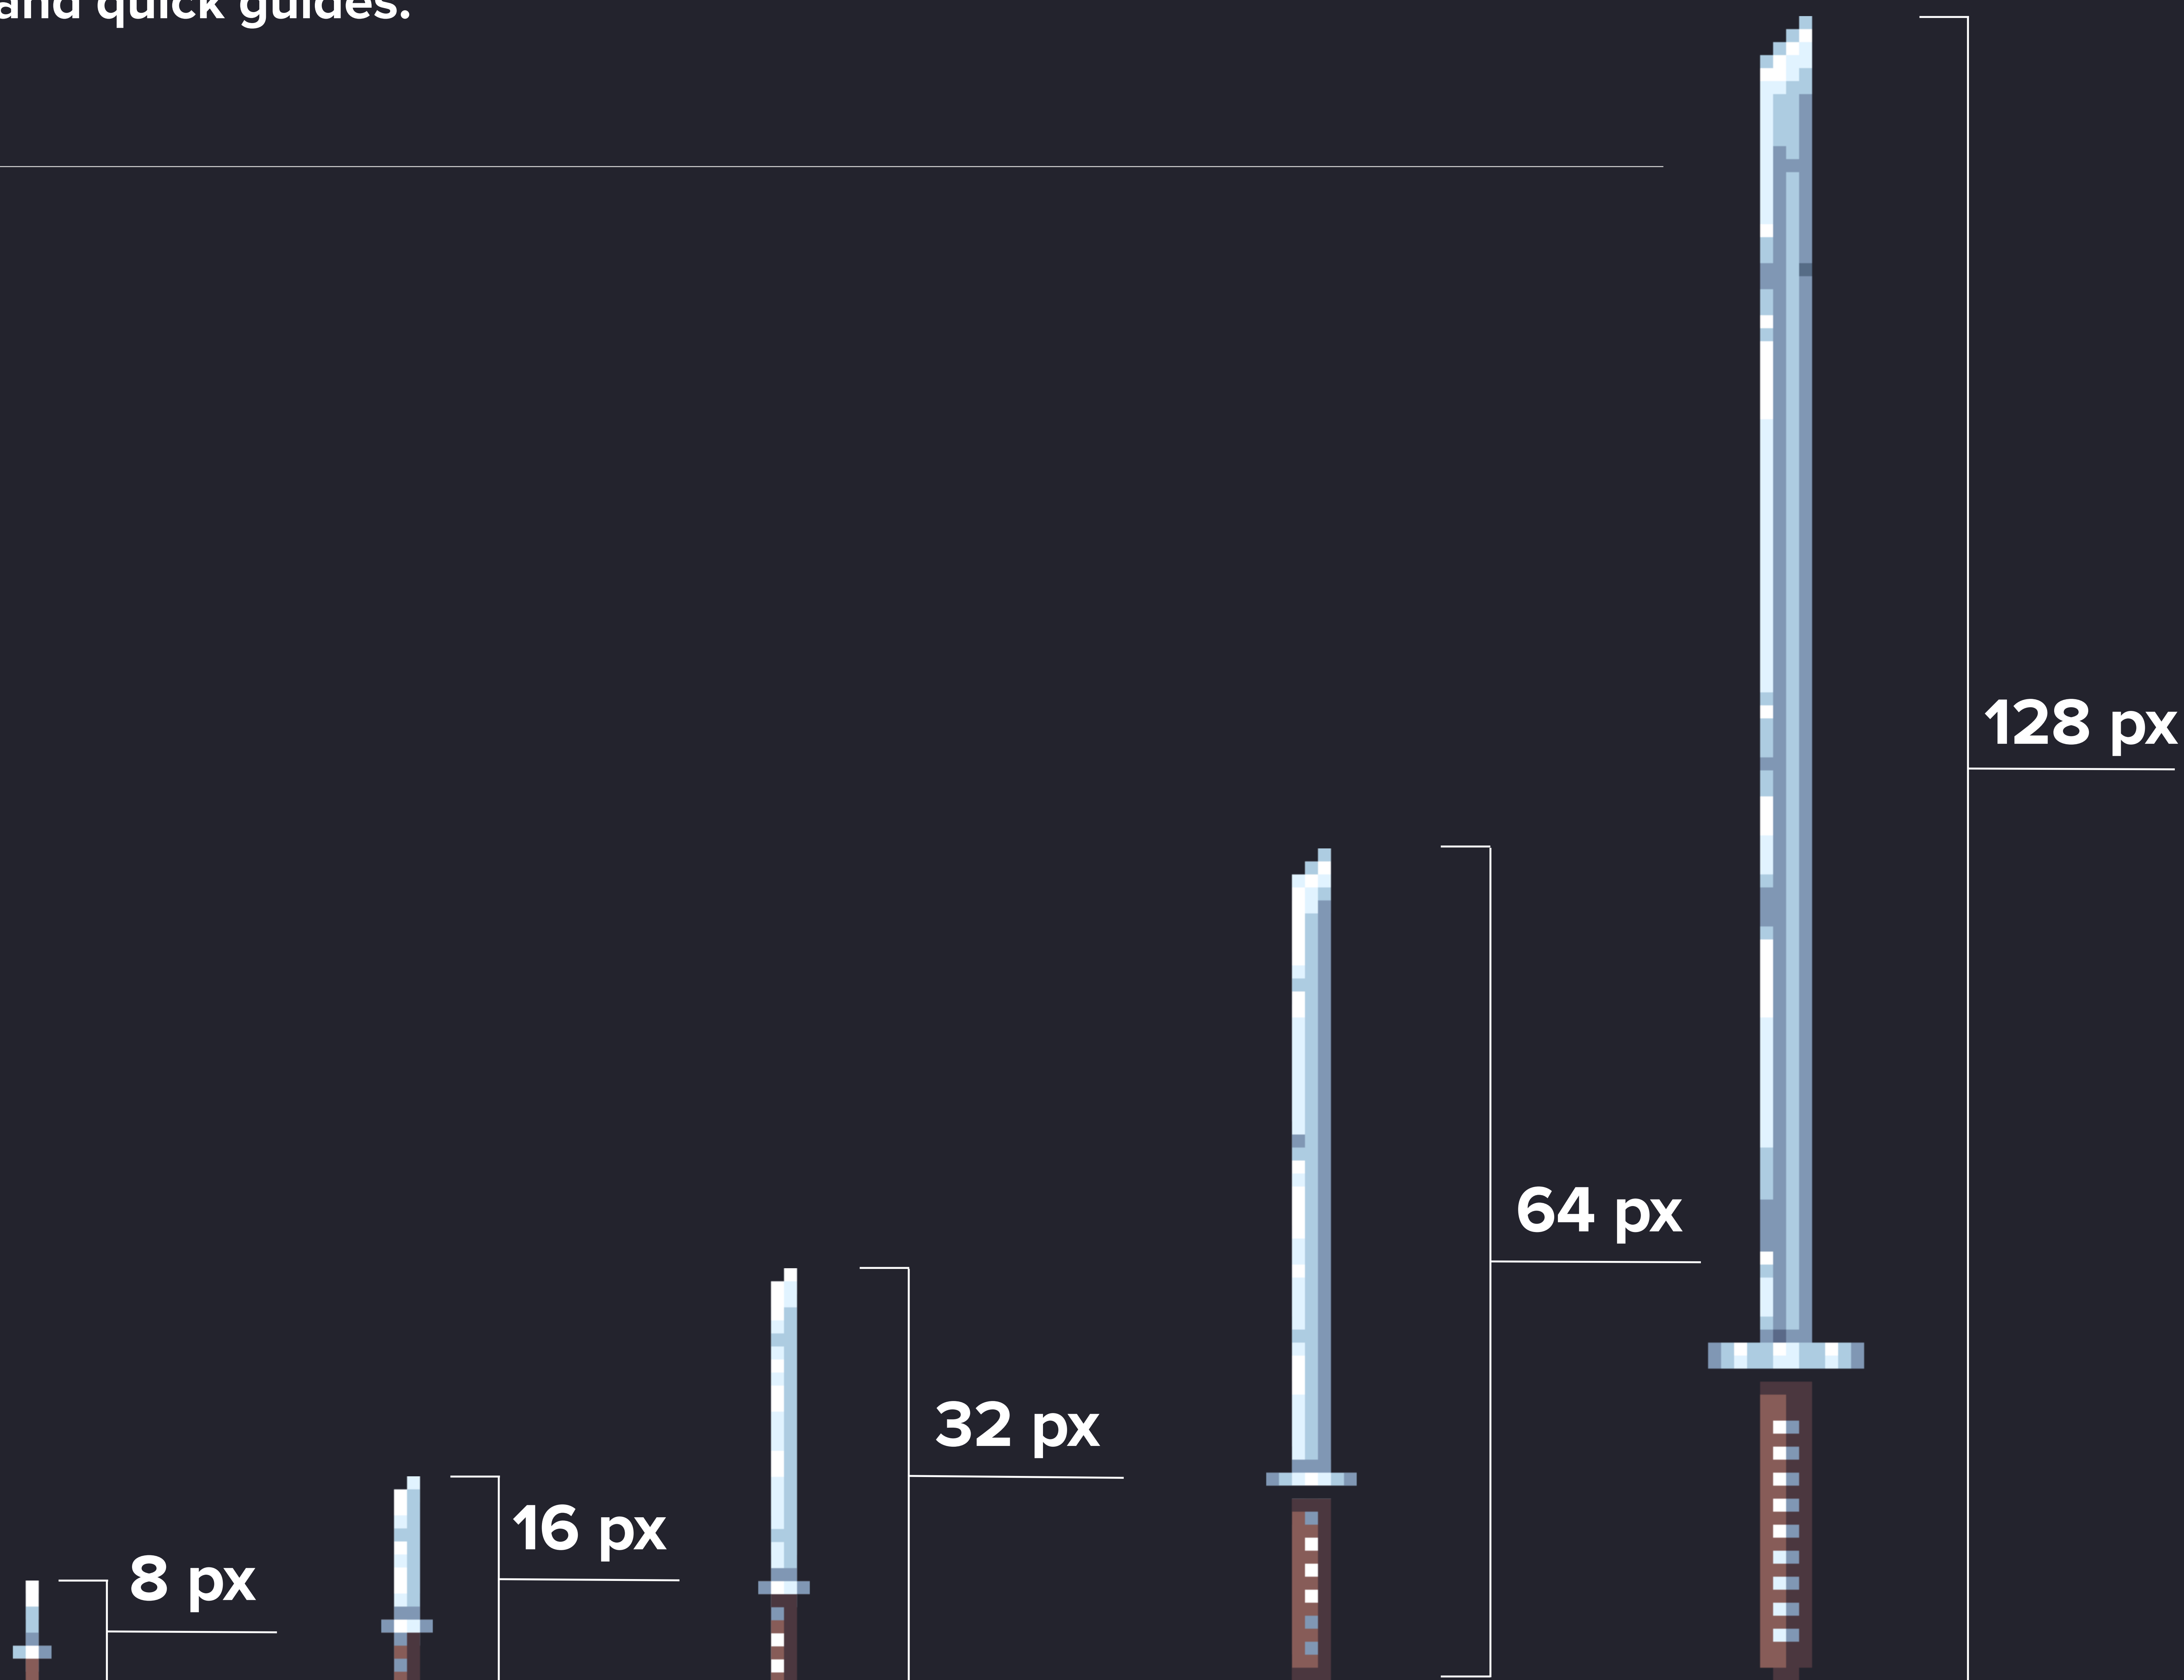

Master 8-32 px sprites first. Then, (and if you want) go to 64-128 px.

Use downloadable resources: Sprites, sprite sets, mockups, worksheets, and quick guides.

Remember to follow the workflow: Outlines & Contours, Shapes, Colors, Shading & Lighting, and Details.

Remember to follow the SPECC: Size, Perspective, Color & Light, and Composition.

Practice animation: advanced techniques, parallax animation (horizontal and vertical scrolling)

Monetize your pixel art mastery

Gamedev. Get hired as a pixel artist or participate in game jams to gain practice.

Freelance. Feeling like you can take commissions? Launch Fiverr. Create game art, music album covers, ad creatives, and musical clip animations.

Art Studio. Fancy managing other artists? Launch your own Art Studio.

Music Channels. Get music from places like epidemic sound and create looping Pixel Art animations for your music channel.

Education. Love creating Pixel Art and sharing your knowledge? Launch your own Pixel Art course! Or start a YouTube channel, or stream on Twitch.
